

ABSTRACT OF THE DISCLOSURE

A computer implemented meta search engine and  
search method. In accordance with this method, a query  
is forwarded to one or more third party search engines,  
5 and the responses from the third party search engine or  
engines are parsed in order to extract information  
regarding the documents matching the query. The full  
text of the documents matching the query are downloaded,  
and the query terms in the documents are located. The  
10 text surrounding the query terms are extracted, and that  
text is displayed.
